

Second Circular

FROM GONDWANA TO LAURASIA

The 6th International Palaeontological Congress

Monday 7th Friday 11th, November 2022
Khon Kaen, Thailand

SCIENTIFIC SESSIONS/SYMPOSIA

- Evolution and extinction of giants: the palaeobiology of very large organisms
- Insights into Ediacaran life
- Devonian palaeoenvironments and mass extinctions
- From platforms to reefs – faunas and floras from the Archean to the Recent
- Bridging palaeontological and geological collections: the indissoluble complementarity
- Ichnology: from ichnotaxonomy, the ichnofacies paradigm to applications in paleoenvironmental reconstructions from marine to continental environments
- **Palaeobiogeography of the Western and Eastern Tethys – migration routes and palaeoceanography**
- Tropical paleobiology
- Workshop on the International Research Network Paleobiodiversity in South-east Asia
- Paleoenvironments in Paleontology: methods, tools and limits. A review to go further
- Freedom to Breathe: integrating the evolution of animals and their environments during the early Palaeozoic
- Digitizing paleontological collections
- Paleontological heritage, geopark and geotourism
- Fish evolution through the Mesozoic and Cenozoic: anatomy, phylogeny, ecology, biogeography
- The appearance and loss of flight in paravians
- Life on the shelf
- Dinosaur ichnology comes of age: the geo-heritage value of the tetrapod trace fossil record
- Late Neogene-Quaternary continental ecosystems, zoogeography, and biotic exchange across Asia-Pacific
- Understanding Asian Cenozoic landscape and climate evolution
- The evolution of forest ecosystems: dead trees and the stories they tell
- Digital paleontology: new insights into the evolution of the organisms through multidisciplinary
- Permo-Triassic mass extinction and recovery
- Advances in vertebrate palaeohistology
- Fossil hunting in the Far East: the history of paleontological collecting in eastern Asia
- Fungi in the fossil record
- The origin and rise of a land flora: from Laurentia to Gondwana and back again
- Recent advances on metazoan diversifications from Early Palaeozoic Lagerstätten
- The 4th Asian Ostracod Meeting (AOM4)
- Palaeozoic fishes and the first tetrapods: evolution, biogeography and past environments
- Infaunal feedbacks during mass extinctions and their aftermaths
- From Pangaea to the break-up of Gondwana: biogeography and vertebrate biodiversity throughout the Mesozoic
- Preserving the world's natural history: an ethical dilemma
- Open session

IMPORTANT TIMES

September 2021; Open of online registration system (with abstract submission)

1st September 2021 – 31st October 2021; Payment of very early registration

1st November 2021 – 30th December 2021; Payment of early registration

1st January 2022 – 15th June 2022; Payment with regular rate registration

15th June 2022; Deadline for abstract submission

16th June 2022 – 30th September 2022; Late registration

1st October 2022 – conference; Last minute registration

15th October 2022 – Final programme of the symposia to be announced
